File Submission Guidelines†

Karaoke tracks, instrumentals (beats) or music stems from 3rd party engineers:

- ✓ For optimal results we recommend WAV or AIFF files recorded at or greater than 24-Bit, 48kHz.
- ✓ Please confirm with us if you are unsure about these export settings.

If we are required to mix pre-recorded vocals, please ensure all vocal tracks are:

- ✓ Submitted dry (without any EQ, compression, effects, processing, etc.)
- ✓ Trimmed and edited with audio artifacts or room noise removed.
- ✓ Tuned (if required) using Melodyne or equivalent software.
- ✓ Additional fees apply for vocal tuning and noise removal.

Recording

\$60/hr

Includes basic processing (EQ, compression if needed) and organizing of takes.

Music Production

\$700-1000

Includes recording, composing, editing, mixing & mastering. Price may vary, contact for details.

Mixing

\$350/song

Complete mix for multi-stem (tracked out) projects. Includes up to 3 revisions.

Mastering

\$75/song

Stereo master for streaming and online delivery. Includes up to 3 revisions.

Vocal Tuning

\$50/hr

Manual vocal tuning using Melodyne.

Editing & Restoration

\$45/hr

Audio editing, cleanup and noise removal for pre-recorded audio.
